

KREPP, Tracey

I have proudly called Christmas Island home since 1992, raising my family here and working alongside my husband in our local electrical business. Over three decades we have built strong community ties and contributed to the island's economy while supporting local families. I believe Council needs representatives who will listen, cut through bureaucracy, and deliver meaningful outcomes. With two young granddaughters, I am especially motivated to ensure the next generation has opportunities to grow, thrive, and remain connected to the Island they love. I value sustainability, family wellbeing, and strengthening local business, while respecting the unique culture and environment that make Christmas Island special. If elected, I will bring compassion, lived experience, and a commitment to listening to residents ensuring that families, workers, and young people all have a strong voice in shaping a vibrant and inclusive future for our community.
